RE: Integrity of the Proposition 8 Vote Count

Dear Secretary Bowen:

I represent clients challenging the 2004 presidential election in Ohio as part of an ongoing civil rights conspiracy. Over the past months, new whistle blowers have come forward with detailed evidence of how Karl Rove, on behalf of tobacco and political clients, and with the assistance of law enforcement agencies in Ohio between 2000 and 2006 and the United States Justice Department during his tenure in the White House, has corrupted the national electoral process through various means, including manipulation of electronic vote tabulators.

Although Ohio was Mr. Rove's central target in the 2004 presidential election, the scope of our inquiry and evidence has broadened to include all elections of national significance in this decade where media-sponsored professional exit polling has indicated the likelihood of fraudulent manipulation of the vote count.

Based on information we have received, it appears that this year's California Proposition 8 election reflects such an exit poll discrepancy. The issue presented in Proposition 8 is part of the national culture war that Mr. Rove and his associates seek to perpetuate. Therefore, we want you to know of our interest in this election and our interest in cooperating with you in any review you may conduct in this matter.

In furtherance of our litigation, we intend to subpoena the underlying exit poll data for Proposition 8 election. This is a part of our effort to assist the new generation of honest law enforcement authorities, of which you are such a prominent part, for the purpose of further documenting and terminating the pattern of corrupt activity in which Mr. Rove and his associates have heretofore engaged.

Sincerely yours,

/s/

Clifford O. Arnebeck, Jr.
Attorney at Law
